Dear Mr. Sharma,

This is to inform you that our Society would be carrying out installation of JSW Metal sheet roofing on our O/H Water Tank due to constant rain water leakage/seepage on terrace thereby damaging the building structure.

Since this work is being carried out on an urgent basis, considering the damage the rain water has caused so far, we request you to kindly depute your engineer to our site ASAP and consult our Contractor for any clarification in this regard. The work is expected to start within the next 10 days.

Also, we would like to know the **status of the overdue payments** that have not yet been cleared by MTNL as well as the arrears against the revised rates w.e.f. July-2018 to June-2021.

Regards

Mgt. Committee
AMIDHAR CHS LTD
